Contents

1.	VARIATION, CONTROL, AND BIAS		1
	1.1.	Introduction	1
	1.2.	Strategy in Controlled Experiments— Sampled and Target Populations	3
	1.3.	The Principal Sources of Variation in the Responses	7
	1.4.	Methods of Control	8
	1.5.	Effects of Bias	12
	1.6.	Summary	13
		References	14
2.	STATISTICAL INTRODUCTION		15
	2.1.	Drawing Conclusions from Data	15
	2.2.	Tests of Significance	18
	2.3.	Confidence Intervals	20
	2.4.	Systematic Differences Between the Populations	22
	2.5.	The Model When Bias is Present	25
	2.6.	Summary	29
		References	31
3.	PRELIMINARY ASPECTS OF PLANNING		32
	3.1.	Introduction	32
	3.2.	The Statement of Objectives	33
	3.3.	The Treatments	35
	3.4.	Measurements of Treatment Levels for Individual Persons and the Effects of Grouping	38
	3.5.	Other Points Related to Treatments	40

3.6. Control Treatments 42
3.7. The Responses 44
3.8. Timing of Measurements 46
3.9. Summary 48
References 49

4. FURTHER ASPECTS OF PLANNING 50

4.1. Sample Size in Relation to Tests of Significance 50
4.2. Sample Size for Estimation 55
4.3. The Effect of Bias 58
4.4. More Complex Comparisons 59
4.5. Samples of Clusters 61
4.6. Plans for Reducing Nonresponse 65
4.7. Relationship Between Sampled and Target Populations 68
4.8. Pilot Studies and Pretests 70
4.9. The Devil's Advocate 71
4.10. Summary 72
References 73

5. MATCHING 74

5.1. Confounding Variables 74
5.2. Matching 78
5.3. The Construction of Matches 81
5.4. Effect of Within-Class Matching on x 84
5.5. Effect of Caliper Matching on x 87
5.6. Effect of "Nearest Available" Matching on x 88
5.7. Effect of Mean Matching on x 90
5.8. Effects on bias of $\bar{y}_1 - \bar{y}_2$ 90
5.9. Effect of Matching on the Variance of $\bar{y}_1 - \bar{y}_2$ 93
5.10. Introduction to Statistical Analysis of Pair-Matched Samples 94
5.11. Analysis with Mean Matching: y Continuous 97
5.12. Summary 97
References 100

6. ADJUSTMENTS IN ANALYSIS 102

6.1. Introduction 102
6.2. y Continuous: x's Classified 102
6.3. y Binomial: x's Classified 105
6.4. Treatment Difference Varying From Cell to Cell 106

6.5. y and x's Quantitative: Adjustments by Regression (Covariance) 108
6.6. Regression Adjustments with Some x's Classified 110
6.7. Effect of Regression Adjustments on Bias in $\bar{y}_1 - \bar{y}_2$ 112
6.8. Effect of Curvature on Linear-Regression Adjustments 113
6.9. Effectiveness of Regression Adjustments on Precision 115
6.10. Effect of Errors in the Measurement of x 117
6.11. Matching and Adjustment Compared: In Experiments 119
6.12. Matching and Adjustment Compared: In Observational Studies 121
Appendix to Section 6.12 123
6.13. A Preliminary Test of Comparability 125
6.14. Summary 126
References 128

7. SIMPLE STUDY STRUCTURES 130

7.1. Introduction 130
7.2. The Single Group: Measured After Treatment Only 130
7.3. The Single Group: Measured Before and After Treatment 131
7.4. The Single Group: Series of Measurements Before and After 132
References 138
